ACCESS CONTENT FROM ANYWHERE

ASG-Mobius View

A SINGLE INTERFACE FOR MULTIPLE USERS

All employees—regardless of location, role, or computing platform—require access to critical and related information that is typically scattered throughout an organization. Customers, partners and suppliers may also need access to similar information. By providing an efficient and easy-to-use user interface with reusable Web components to access that information, organizations are able to eliminate the use of multiple different user interfaces.

ASG-Mobius View* is an intuitive, modern, user interface for the ASG-Mobius ViewDirect Content Repository. It does not require client Java applets and plug-ins, improving security, administration and maintenance. ASG-Mobius View gives Web developers the ability to quickly and easily add Web UI components to any Web application to search, access, view, download, and link enterprise content indexed and archived in the ASG-Mobius ViewDirect Repository or CMIS connected repository.

VIEWING MADE EASY

ASG-Mobius View automatically reformats and Web-enables content without changing or copying original content for secure delivery and safe viewing. It can also open content that is archived application-specific for viewing with an external application, e.g., Microsoft Excel. Users can see multiple views of the same content e.g., by date, by time, and by customer without replicating documents. Documents can also be manipulated e.g., zoom in/out and rotated to further ease viewing documents. ASG-Mobius ViewDirect Reports and Topic Indexes in the ASG-Mobius ViewDirect Repository are automatically organized into folders. ASG-Mobius View users can drill down through folders to browse and find documents or create a 'Favorites' folder for commonly accessed documents. Clicking a list of previously-accessed screens provides quick navigation. ASG-Mobius View also provides a trail showing users how they arrived at the current document or folder.

WEB COMPONENT ACCESS TO ALL CONTENT

ASG-Mobius Web Components are ideal for organizations that need to retrieve and view content in any existing Web services-based system or application with business processes. Web developers perform the customization in the web pages directly, instead of Java developers doing the customization in server code that needs to be compiled and redeployed. ASG-Mobius Web Components are reusable making them deployable anywhere customers need access to content in the ASG-Mobius ViewDirect Repository.

FEATURES

- Delivers Web Components for customized user interfaces
- Converts documents into Web-ready formats
- Provides multiple views of the same content
- Comes with full-text search
- Allows searches to be saved and shared with multiple users
- Supports multiple Web Browsers

POWERFUL SEARCH CAPABILITIES

ASG-Mobius View can perform full-text search against the ASG-Mobius ViewDirect Repository for documents and associated content – all searches can be saved and be reused as needed. Searches can also be filtered by field or line to fine-tune search results. ASG-Mobius View supports collaboration and ease-of-use by allowing users to create, save and share form-based public searches for easy access by multiple authorized users.

ENHANCED CUSTOMIZATION

ASG-Mobius View can be customized and stylized by having company logos, images, headers, and/or footers added to the Web-based user interface without building a custom application. Web developers can also globally change fonts, colors, and images.

CONFIGURATION AND ADMINISTRATION

Using ASG-Mobius View with standard Web browsers, Web developers can install and configure ASG-Mobius View easily and very quickly. And with an automated self-correcting facility, the ASG-Mobius View has high-availability with high-speed performance, load balancing, and failover support.

*Previously called Mobius Luminist
